FULL TIME

Software Developer (m/f/d)

Java Spring Boot / PHP Backend - DevOps

Vue.js Web Frontend - Programmer - Engineer

We’re looking for senior software developers and rising programming talents to help us implement the next generation of our lean software solutions.

With short decision-making paths, creative freedom, and professional support from our side, you’ll have the opportunity to reach your full potential and bring your ideas to life in the best possible way.

CHEQSITE develops modern apps for the safety inspection and maintenance of equipment and workplaces. Leading companies in industry, logistics, construction, and retail rely on our applications for their inspections.

Your work with us is both varied and challenging. Using cutting-edge technologies and tools, we develop practical solutions that deliver real value to our customers.

Job ad in German, please visit our site www.cheqsite.de/de/.

WHAT TO EXPECT IN THIS ROLE

- Your journey as a Software Developer at *CHEQSITE* begins with the implementation of moderately complex frontend or backend modules. Together with our senior developers, you'll help lay the foundation for the next generation of our software.
- As a backend developer, you'll primarily work with Java Spring Boot.
- In DevOps, you'll support the setup and maintenance of our server infrastructure, monitoring tools, and CI/CD pipelines.
- As a frontend developer, you'll implement moderately complex frontend modules using Vue.js or SAPUI5.
- Our web and desktop applications sync seamlessly with our native Android (Java/Kotlin) and iOS (Swift) apps - giving you the opportunity to expand your skills into mobile development if you’re interested.
- In industrial research and development projects, we explore cross-platform development, augmented reality (AR), artificial intelligence (AI), and machine learning (ML).

CHEQSITE GmbH / Rudower Chaussee 29 / D-12489 Berlin
Tel. +49 030 23320232 / kontakt@cheqsite.de / www.cheqsite.de

- We also use Amazon Web Services (AWS), Microsoft Azure Cloud, Google Cloud Services, and many other platforms and technologies to deliver our services.

WHAT MAKES YOU A GREAT FIT

- You're a passionate programmer who wants to help shape practical and appealing software.
- Having already proven your skills in a professional setting, you're eager to keep learning and growing.
- You have solid experience with Java Spring Boot for back-end development. Knowledge of other JavaScript, PHP, or Python frameworks like Electron, Node.js, Django, Laravel, or Symfony is a plus, but not a must.
- In DevOps, you've worked with well-known cloud providers, modern monitoring tools (e.g. Grafana, Elasticsearch, Kibana), and CI/CD pipelines.
- As a front-end developer, you bring experience with Vue.js or another modern JavaScript web framework to the table, such as Angular, OpenUI5 / SAPUI5, React, Ember.js or Flutter as an alternative.
- You're confident working with both NoSQL and SQL databases like Couchbase, MongoDB, MySQL, or SQLite.
- As a senior developer, you use code reviews not only to ensure functionality, but also to mentor junior and mid-level developers on elegant coding practices.
- Fluent communication in either German or English is essential.

We’re excited to welcome Full-Stack Web Developers (with a focus on either front-end or back-end), Computer Scientists, IT Engineers, Backend Application Developers, Frontend Experts, DevOps Engineers, Game Programmers, Mobile Developers, and graduates in Computer Science, Informatics, Media Informatics, or Electrical Engineering - or simply outstanding programmers with the right skills - to strengthen our successful team.

WHY YOU’LL ENJOY WORKING WITH US

- Your ideas and contributions are appreciated and valued. Every developer takes pride in shaping recognizable parts of our software systems.
- You’ll benefit from plenty of creative freedom, fast decision-making processes, and professional support to help you and us achieve success more efficiently.
- Senior developers enjoy additional conceptual and organizational freedom.

CHEQSITE GmbH / Rudower Chaussee 29 / D-12489 Berlin
Tel. +49 030 23320232 / kontakt@cheqsite.de / www.cheqsite.de

- ▷ Expect a varied and challenging role. At the same time, we place great value on work-life balance and actively support both your professional and personal development.
- ▷ A mostly stress-free workplace awaits you with plenty of options for food, music, sports, and games, all in a comfortable, air-conditioned environment.

SOUNDS EXCITING?

Please send us your resume at develop@cheqsite.de and we'll get back to you.

We're looking forward to getting to know you!
